

Business Intelligence Carrier Performance Dashboard

Visualize carrier performance in real time to identify and solve performance issues that affect your operations.

The Carrier Performance Dashboard within Banyan's new Business Intelligence Suite is a powerful way to visualize shipment data by carrier, all in one place.

This easy-to-read dashboard will allow you to view key carrier performance metrics like late and on-time pick-ups and deliveries, enabling you to...

- Eliminate hours spent manually pulling reports from different carriers and solutions.
- Gain a deeper understanding of your carrier relationships and data with comprehensive filtering capabilities.
- Quickly identify and reward carriers that consistently deliver on time and in-budget.
- Set user permissions to control access to your data.
